

## Are you planning to get the 2017 flu vaccine?

Mayo Clinic is seeking healthy women and men, 19-79 years old, to participate in a research study. The purpose of this study is to explore the body's immune response to the flu vaccine and how it differs by age.

### You may be eligible to participate if:

- You are between 19-79 years old
- You are a Mayo Clinic patient
- You want to receive the flu vaccine (standard dose)

The study will include two study visits. At the first visit, we will ask you about your general health and collect a blood sample (during morning only). The second visit will occur 4 weeks after you have received your flu vaccine, so that we can collect a second blood sample (during morning only).

We will compensate you for your time.

For information, please contact study coordinator at [Hines.Lisa@mayo.edu](mailto:Hines.Lisa@mayo.edu) or 507-266-1710.
