SHOULD I TAKE ASPIRIN?
A decision making tool

High Risk (50%)
BENEFITS AND HARMs OF ASPIRIN OVER 10 YEARS

The primary benefit of aspirin is that it may help prevent a heart attack. The primary harm of aspirin is a risk of bleeding from the stomach that will require you to receive emergency care, receive blood transfusion, undergo endoscopy, and stay in the hospital for about 3 days, expecting a full recovery.

NO ASPIRIN
