Organizational Readiness for SDM Implementation Assessment

Consider the mission, values, and priorities of your organization at this time. Consider the resources required to implement shared decision making and Chest Pain Choice and the benefits. Consider other initiatives, practices, or infrastructures that might compete with implementation of shared decision making and Chest Pain Choice.

How *Appropriate* do you think it is to implement Chest Pain Choice in your organization right now?

Not at All   1   2   3   4   5   6   7   8   9   10   Very

Consider the communication channels of your organization. Consider how easy or difficult it is for you to get a message to all clinicians. Consider how easy or difficult it is for you to promote initiatives in your organization so that people understand their roles. Consider how easy or difficult it is for you to train and educate all clinicians in your organization. Consider whether your organization has ever done anything like this before and the outcome.

How *Feasible* do you think it is to implement Chest Pain Choice in your organization right now?

Not at All   1   2   3   4   5   6   7   8   9   10   Very

Consider the acceptability of the CPCDA among clinicians. Consider how your organization will be able to integrate the tool into the EMR to improve acceptability. Consider your IT capacity and the type of EMR you use. Consider whether there is an easy way to integrate the tool into your EMR (e.g. has this programming already been done for your EMR?).

How *Acceptable* do you think the Chest Pain Choice tool is in your organization right now?
